

Enriching minds, enriching lives.

Improvement on Literacy and Numeracy by painting the walls with mathematics symbols, numbers, calculations and phonics for Languages.

This initiative allows for learners to enjoy mathematics and phonics in a more innovative way. Learners can practice, read and learn while having fun during break time, before school and after school with friends.

It helps take away the fear of academics and learners seeing maths as a monster, as now the paintings are a fun way for everyone to master the big monster.

It has definitely benefited our school in a positive way especially in the foundation phase as learners marks and pass rate has improved. Therefor we as the staff of Kraaifontein A.M.E. enjoy the benefits of this fun yet educational initiative.
